

# GLOBAL VIRTUAL DIGITAL IDENTITY SUMMIT 2021

IDENTITY TRUST TRANSFORMED

The LexisNexis® Risk Solutions Virtual Digital Identity Summit is an annual gathering of global thought leaders and executives spanning customer authentication, digital channels, fraud and risk disciplines. This year, the summit features a global virtual session series with key identity thought leaders and practitioners interacting and sharing insights, experiences and best practices.

## ABOUT THE EVENT

The theme for the 11th annual Digital Identity Summit is Identity Trust Transformed. In this digital first economy, organizations are facing increasing fraud and cyber threats as criminals launch sophisticated attacks and circumvent static fraud prevention and cyber security processes. Identity is central to solving fraud and cyber threat challenges in this increasingly digitized age. Establishing and maintaining trust in the true identity of consumers is essential for organizations to deliver secure products and services while providing exceptional customer experience. The 2021 Virtual Digital Identity Summit will focus on how today's digital transformation leaders can outsmart fraud and build stronger customer relationships by transforming identity trust.

## WHO SHOULD ATTEND

The Virtual Digital Identity Summit is designed for innovators, disruptors and visionaries in the identity space. We feature sessions with unique insights for industries such as financial services, travel, eCommerce, digital and media organizations looking to grow profitability in our digital first economy. This is a must attend virtual event for thought leaders, executives and practitioners in authentication, identity proofing, onboarding, customer acquisition, digital channels and fraud and risk disciplines.

## WHY ATTEND

Gain access to the latest insights from top research analysts, discover best practices and connect with experts and peers.
