

Instantly verify information
and rapidly follow-up on leads
without leaving the field.

Today's law enforcement officers face an uphill battle. Criminals and suspects now have access to information resources on the go, meaning they can often stay one step ahead. In this new dynamic investigative environment, law enforcement is unable to wait to return to the office to follow up on leads or run a name through the system. They need to be able to generate information and leads quickly – in the field – as they develop.

In the past, this issue was addressed by assigning resources to remain at headquarters to serve as the liaison between front-line officers and the critical data they required for investigations. Budget cuts, staffing shortages and requirements for real-time information make this approach unfeasible – when personnel are deployed to the field, their critical investigative tools must go with them.

Bringing Actionable Information to the Action

Law enforcement officers need a user-friendly application that makes extensive data available anytime, anywhere, to help them conduct key interviews and apprehend suspects and fugitives faster than ever. Additionally, the ability to verify identities on scene at an incident or during a remote investigation is paramount. How much more efficient would the investigative process be if officers had comprehensive and authoritative information on the go, including:

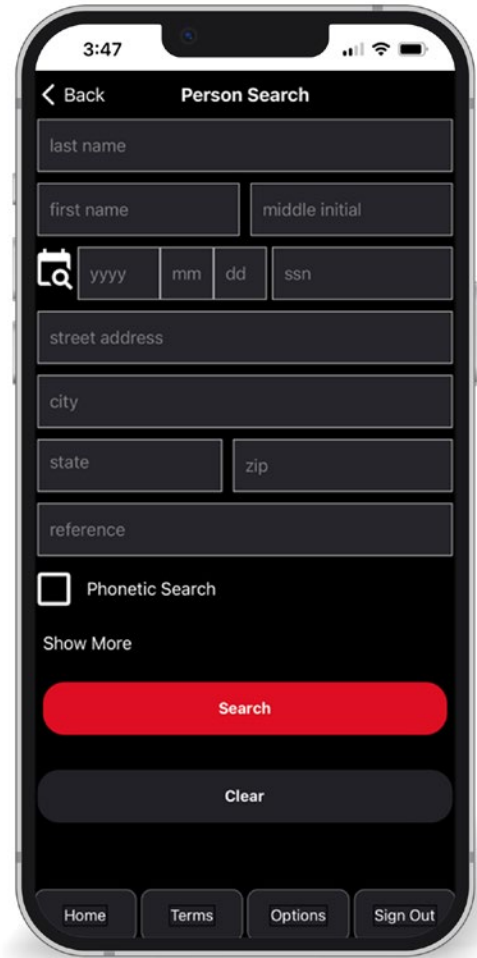

-  Names
-  Addresses
-  Phone numbers
-  Assets, including real property records, motor vehicles, watercraft and aircraft
-  Associates
-  Death records
-  Business information

LexisNexis Accurint Mobile – The Power of Public Records at your Fingertips

With LexisNexis Accurint Mobile, law enforcement officers can verify information in the field and rapidly follow-up on new leads as they develop. This provides access on mobile devices to the same powerful information previously only available through a PC or laptop. Now, law enforcement can locate people and vehicles, uncover assets, investigate businesses and generate comprehensive reports from any Apple® iPhone®, Apple® iPad® or Android™ device.

Accurint Mobile processes search results in seconds, and since it has the same 99.8% data accuracy rate as Accurint for Law Enforcement, it can help in locating subjects, apprehending targets and closing more cases. Accurint Mobile is provided at no additional charge to Accurint for Law Enforcement users, including training and no setup or maintenance fees. Accurint Mobile is a valuable complement to any agency's investigative toolset.

About LexisNexis® Risk Solutions

LexisNexis Risk Solutions (www.lexisnexis.com/risk) is a leader in providing essential information that helps customers across all industries and government predict, assess and manage risk. Combining cutting-edge technology, unique data and advanced scoring analytics, we provide products and services that address evolving client needs in the risk sector while upholding the highest standards of security and privacy. LexisNexis Risk Solutions is part of Reed Elsevier, a leading publisher and information provider that serves customers in more than 100 countries with more than 30,000 employees worldwide.

Our government solutions assist law enforcement and government agencies with deriving insight from complex data sets, improving operational efficiencies, making timely and informed decisions to enhance investigations, increasing program integrity, and discovering and recovering revenue.

The LexisNexis Accurint Mobile services are not provided by "consumer reporting agencies," as that term is defined in the Fair Credit Reporting Act (15 U.S.C. § 1681, et seq.) ("FCRA") and do not constitute "consumer reports," as that term is defined in the FCRA. Accordingly, the LexisNexis Accurint Mobile service may not be used in whole or in part as a factor in determining eligibility for credit, insurance, employment or another purpose in connection with which a consumer report may be used under the FCRA. Due to the nature of the origin of public record information, the public records and commercially available data sources used in reports may contain errors. Source data is sometimes reported or entered inaccurately, processed poorly or incorrectly, and is generally not free from defect. This product or service aggregates and reports data, as provided by the public records and commercially available data sources, and is not the source of the data, nor is it a comprehensive compilation of the data. Before relying on any data, it should be independently verified. LexisNexis and the Knowledge Burst logo are registered trademarks of Reed Elsevier Properties Inc., used under license.
